## SUMMARY

---

I'm a full stack developer with 3 years of experience who builds functional and visually appealing websites and apps using tools like Laravel, Next.js, TypeScript, SQL, Figma, and Adobe software. I founded Prekoda to help individuals with their website and branding needs. I prefer building from scratch to ensure my creations are useful, unique and reliable.

## EDUCATION

---

### Full Stack Extensive Course

July 2022 - February 2023

*The Odin Project*

*Remote*

- Completed a project based curriculum focusing on real world web development. It thoroughly covered HTML, CSS, JavaScript, and React. Has an active Discord community with over 100,000 members.

## PROJECTS

---

### Prekoda

2025

<https://www.prekoda.com/>

- Utilised Next.js, Laravel, and TypeScript to design and develop the Prekoda website, prioritising accessibility, performance, and responsive design.
- Developed the brand identity from the ground up, encompassing logo design, typography, and visual system, utilising Figma and Adobe Illustrator.
- Implemented SEO best practices, Open Graph metadata, and performance optimisation strategies to enhance discoverability and credibility.

### Scantek

2025

<https://www.scantek.com/>

- Refactored and stabilized a previously incomplete WordPress + Elementor website, resolving broken layouts, non-functional components, and restoring core UX functionality across devices.
- Resolved technical issues, including broken HubSpot forms and a malfunctioning carousel. Additionally, outdated plugins were updated, and mobile responsiveness was enhanced throughout the site.

## EXPERIENCE

---

### Founder

March 2025 - Present

*Prekoda*

*Perth, WA*

- Designed custom logos and visual identity systems tailored to each client's brand, industry, and audience.
- Crafted highly responsive and user friendly websites tailored to the needs of businesses seeking scalability and usability.
- Oversaw the entire lifecycle of projects, from conceptualisation to operational deployment. This entailed delivering high quality designs and well structured code for a diverse range of clients.

### Web Developer

March 2025 - April 2025

*Scantek*

*Perth, WA*

- Completed and deployed a previously unfinished WordPress site using Elementor and custom CSS.
- Improved UX, fixed broken links, improved responsiveness and accessibility.
- Updated insecure dependencies and ensured brand alignment and SEO compliance.
